PROFESSIONAL SUMMARY

Informatics Engineering graduate from Universitas Atma Jaya Yogyakarta with hands-on experience in building scalable web and cross-platform mobile applications. Proficient in React.js, TypeScript, Vite, RESTful APIs, Laravel, and Flutter, with a strong background in developing academic information systems and interactive admin dashboards. Skilled in building responsive UIs, seamless API integrations, and robust end-to-end frontend solutions.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, Vite, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design

API & Security: REST API, JWT Authentication, Role-Based Access Control, Postman

Tools: Git, Figma, Docker, Firebase

Back-End & Database: Laravel, Node.js, Express.js, PostgreSQL, MySQL, Prisma

Mobile: Flutter, Dart

EXPERIENCE

Hagios School of Life • Software Developer Intern
January 2026 • March 2026 | Yogyakarta, Indonesia

- Engineered and deployed a full-stack Academic Information System (SIAKAD) for 220+ active users (37 teachers and 184+ students) using React.js, Vite, Laravel REST API, and MySQL.
- Developed 5 core administrative modules (GPS Attendance, Tuition/SPP Payments, Digital Report Cards, Announcements, and Master Data) across web and mobile platforms in a 45-day sprint.
- Integrated frontend interfaces with REST APIs for real-time data fetching, rendering, and state management.
- Built a cross-platform Flutter mobile app enabling GPS-geofenced attendance with photo selfie validation for 37 teachers within a 30-meter radius.
- Collaborated using Agile-Iterative methodologies and Git feature-branch workflows to deliver incremental sprint goals.

PROJECTS

Academic Data Security Testing System • Undergraduate Thesis Project
React.js, Vite, Node.js, Express.js, PostgreSQL, Ethereum Sepolia, Hyperledger Fabric

- Architected a high-performance web dashboard evaluating academic data integrity across 2 blockchain environments (Ethereum Sepolia Testnet & Hyperledger Fabric).
- Implemented SHA-256 cryptographic verification and JWT-based Role-Based Access Control (RBAC), securing API communication for critical academic record checks.

Website UMKM dan Potensi Padukuhan Sumber • KKN Project
React.js, Bootstrap CSS, Laravel REST API

- Built a responsive village and UMKM website with an admin dashboard for managing products, media galleries, and public reports using React.js, Bootstrap, and Laravel REST API.

EDUCATION

Universitas Atma Jaya Yogyakarta • S1 Informatika *September 2022 – August 2026*

IPK: 3.67/4.00
